NEOGEN Corporation develops, manufactures, and markets animal and food safety solutions.

NEOGEN (NASDAQ: NEOG), founded in 1982, has grown to 1,820 employees in multiple U.S. and international locations. NEOGEN has been repeatedly named one of Forbes Magazine's best small companies in America, and is in NASDAQ's top tier of companies—its Global Select Market. For more about NEOGEN, please visit **NEOGEN.com**.

Animal Safety

NEOGEN's products include:

Veterinary Performance and Companion Animal Products

NEOGEN's biological line includes BotVax® B, the only USDA-approved vaccine against equine botulism type B; EqStim®, an effective USDA-approved immunostimulant for adjunctive treatment of equine respiratory disease complex; and UNIPRIM®, a popular veterinary antibiotic.

Veterinary Instruments and Supplies

NEOGEN offers affordable precision veterinary instruments and supplies. NEOGEN's extensive line of durable and disposable instruments is convenient and dependable. We offer products from needles and syringes, to breeding and delivery.

Rodent Control Products

NEOGEN's proven rodenticides are used for control of rodents and complement its disinfectants as a critical component of an overall biosecurity program. Rodents compromise the quantity and quality of food and feed, and spread disease.

Insect Control Products

NEOGEN's Prozap Insect Control products include well-known and proven insecticides that have a range of applications in the food and animal safety industries. NEOGEN's Catchmaster products offer non-toxic options for the home and farm.

Cleaners and Disinfectants

Animal facilities, from companion animal veterinary clinics to production livestock operations, benefit from NEOGEN's diverse range of cleaners and disinfectants. NEOGEN also offers step-by-step procedures to clean then disinfect numerous surface types of organic matter, biofilms and serum content. These products have broad germicidal capabilities to remove infectious agents, such as avian influenza.

Livestock and Canine Genomics

NEOGEN Genomics is a leading global provider of DNA testing and bioinformatics for animal protein and veterinary medicine through product lines such as Igenity and GGP.

Diagnostic Products

NEOGEN's tests detect more than 100 different drugs that may be considered drugs of abuse in racing and eventing animals, and residues in food animals.

Food Safety

The company's Food Safety Division markets dehydrated culture media and diagnostic test kits to detect foodborne bacteria, natural toxins, food allergens, drug residues, plant diseases and sanitation concerns. For more about NEOGEN's Food Safety Division, please visit foodsafety.NEOGEN.com.

Reproduction

Genomics

Raising dairy heifers is the second highest expense on dairy farms with the initial investment still not returned well into the second lactation.

Genomic testing helps you make the best decisions for the future by providing estimates of the true genetic potential of your animals — as soon as they're born. Genomic testing increases your herd's profitability through:

Increased Genetic Gain: Genomic profiles provide the accuracy of progeny tests based on 20 milking daughters, while traditional parent averages equate to seven daughters. Expected gains in net merit add tremendous value to dairy herds.

Parentage Verification: Parentage errors are found in approximately 15% of animals tested.

Management of Inbreeding: Avoid negative effects of inbreeding by managing your inbreeding coefficient – even without pedigree knowledge.

Confident Mating Decisions: With production, health and fertility traits identified early on, you can match your heifers' genomic profiles with the right bulls to improve your herd.

A Igenity-Essential: \$32

The Igenity-Essential test is a streamlined offering for commercial dairy farmers that need, well, the essentials. As the most economical test on the market, Igenity-Essential brings the power of genomic technology to your dairy without the bottom line impact. Fifteen of the most economically impactful traits, with data delivered to you faster than any other test on the market. It provides a cost-effective simple sorting tool for commercial heifers that does not rely on submission to the CDCB. Igenity-Essential is available for Holstein and Jersey purebred cattle.

Turnaround Time	Reliability	Parentage
17 Days	~60-65%	Sire confirmation

**Only available for Holstein animals*

Genomics

Igenity-Select: \$40

An excellent decision-making tool for the commercial dairy, Igenity-Select is a streamlined genomic profile that provides highly reliable results at a significant value for cost-conscious producers. It is powered by a low-density chip with custom content, and supported by the CDCB to give accurate results. This test is available for purebred Holstein, Jersey, and Brown Swiss cattle.

Turnaround Time	Reliability	Parentage
17 Days	67-71%	Sire discovery

Testimonial

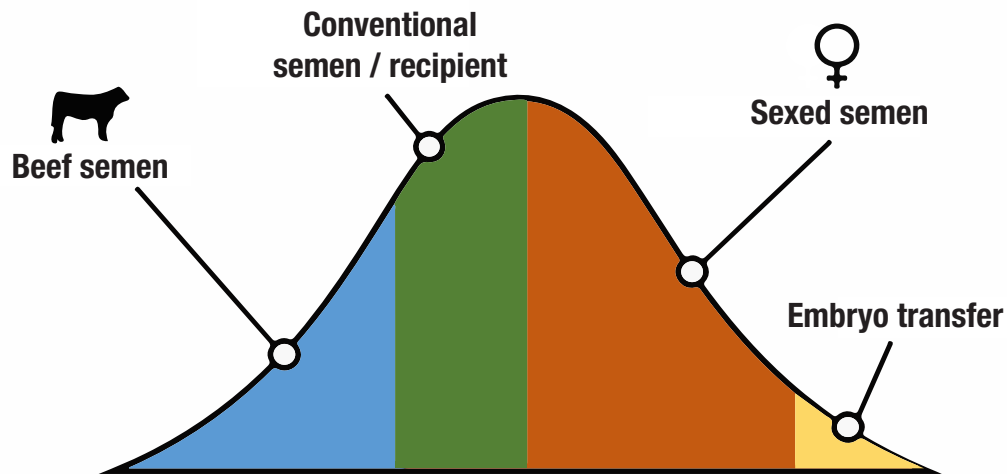

First of all, the help and service I get from the NEOGEN staff is second to none. I receive the information I need via text message on a weekly basis, and someone is always there to provide me with any additional genomics information that I may need. With this technology, and the service and expertise behind it, I've been able to expedite the genetic improvement of my herd through properly managed breeding. The price is very competitive, and with the increased efficiency of my operation, I'm able to realize a complete return on my investment within a year.

E Igenity Dashboard: **FREE** for Igenity Customers

It's important to make sure that anyone using genomics has a genomic protocol in place. A genomic protocol is simply a plan for how an individual dairy producer plans to use the information. Based on which criteria does the producer plan to sort and rank heifers? There are many indexes, such as NM\$ (Net Merit Dollars), that are a great place to start.

Once a method of ranking heifers is implemented, a plan needs to be created to determine how to use this information. Will embryo transfer be used on the top females? Will any sexed semen or beef semen be used... and on what percentage of the animals? It's important to think about these factors and the economics associated with each of these decisions in order to determine the right solution for the dairy. With genomics, there isn't one "right" way to use the information. There are many ways that can make sense and provide a great return on investment for the commercial dairy.

The Igenity Dashboard is an application that allows for simple viewing and interpretation of genomic testing results. Every Igenity producer receives complimentary access to the program, with the ability to share log-in privileges with stakeholders on your dairy. With Dashboard, you will:

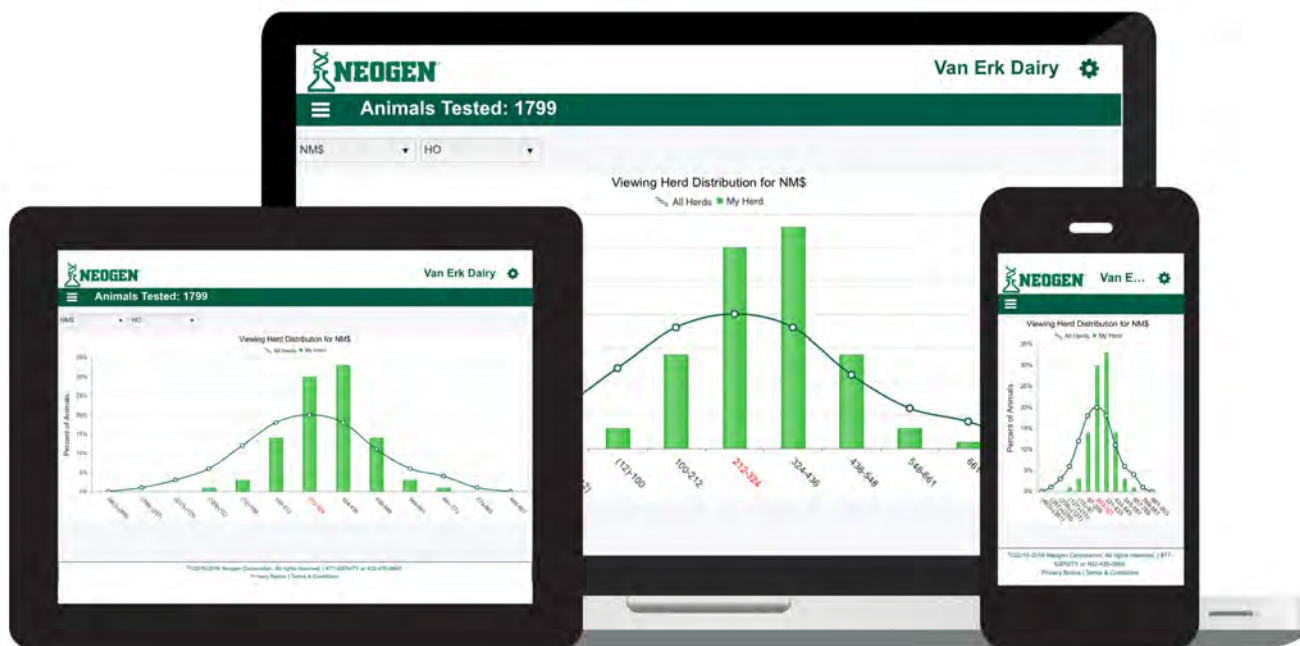

- View various reports about your animals
- Customize reports to show only the traits you need
- Create custom indices to meet your specific breeding goals
- Compare your herd to all herds in the breed database
- See progress in your herd over time

***Interested in the program?
Call 877-IGENITY for a demonstration log-in.***

Genomics

Igenity Dashboard - Genetic information in the palm of your hand

Getting started is easy!

1

Determine your needs.

The Igenity Dairy Heifer Program offers a variety of testing options to best suit your needs. Contact your NEOGEN representative for a free consultation on how to make the program work for you.

2

Collect samples.

Samples can be submitted via tissue samples, hair follicle samples and blood cards. Sample collection devices are available for purchase at genomics.NEOGEN.com. Follow NEOGEN's shipping instructions and deadlines for the fastest turnaround times.

3

Analyze your results.

Your results can be returned in an Excel[®] report, pdf, directly input into your herd management software or via your Igenity Dashboard account. Your NEOGEN representative can help analyze your results to reach your herd's full genetic potential.

Breeding Diagnostics

A2/A2

Y
chrom

HCD

Polled

Are you feeding genetic liabilities or assets?

DETECT
PREGNANCY
AS EARLY AS
28
DAYS

A

BioPRYN® Early Pregnancy Detection

GeneSeek is a certified BioTracking laboratory offering the BioPRYN early stage bovine detection pregnancy diagnostic assay service for beef and dairy cattle producers. BioPRYN is a safe and accurate blood test that provides an easy alternative to palpation and ultrasound in cattle. BioPRYN measures the presence of pregnancy-specific protein B (PSPB) in the animal, a protein only produced by the placenta of a growing fetus. Cows and heifers must be 28 days post-breeding and cows 73 days post-calving to for accurate results.

B

Horned/Polled Testing

The confirmatory test for polled determines if the animal has one or two copies of the dominant polled gene, giving you the information to move your herd away from dehorning practices.

C

Holstein Cholesterol Deficiency (HCD)

A confirmatory test for Holstein Cholesterol Deficiency (HCD) which causes decreased cholesterol production in Holstein cattle. The genetic mutation leaves an animal without the ability to convert energy to fat, seriously impacting basic biological function and causing eventual fatality.

D

A2 Beta-casein

Testing for A2 may allow you to better market your animals. A2 is the beta-casein protein variant that was initially found in cattle. Through selection for high milk production, a mutation occurred creating A1 and A3 variants of the protein. Today, most Holstein animals have the A1 variant. Studies have suggested that there are potential human health benefits associated with consuming A2 milk, and producers in a number of countries are selling their A2-verified milk at a premium.¹

Semen Collection

ElectroJac® 6

The Complete ElectroJac 6 System, with your choice of 1", 2", 2.5" or 3" probe. Ideal's ElectroJac 6 combines the best of more than 30 years experience in automated semen collection instrument design and manufacturing, with state-of-the-art technology, featuring its unique flexibility of automatic and manual settings, ElectroJac 6 is the perfect field unit for even hard-to-collect bulls.

- Unparalleled simplicity of use
- Improved electronics to prevent overcharging
- Powerful gel cell battery
- Bright numeric display
- Trade-in program available

Breeding Supplies

A

PolyLube®

Concentrated Powder Lubricant

PolyLube is a non-sterile, concentrated powder lubricant for obstetrical activities on horses and cattle.

Item No.	Description	Case Ct.
PL114	PolyLube 10oz	12

A

B

General Lube

Non-Sterile Lubricating Jelly

General Lube is a non-sterile, non-spermicidal viscous lubricant for use during obstetric and rectal exams.

Item No.	Description	Case Ct.
79212	General Lube 8oz	12

B

C

Chemise

Protective sleeves to pull over insemination rods that help prevent transmission of contaminants during insemination or embryo transfer. Comes in perforated, easy-tear rolls.

Item No.	Description	Case Ct.
TA837C-18	Chemise Sanitary 18" For AI Pack 100/bx	12
TA837C-21	Chemise Sanitary 21" For ET Pack 80/bx	12

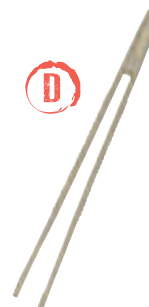

C

D

Tweezers

Specially designed polyester tweezers for easy removal of semen straws from canisters. The grooved tip grips and surrounds the straw without crushing. Transmits little heat or cold. Individually wrapped. 6.5" (16.51cm) long.

Item No.	Description
Tweezers	Cito Straw Tweezers 6.5"

D

E

Cutters

Designed to quickly cut off the sealed end of semen straws. It is made of non-corrosive plastic with a stainless steel blade which cuts off the proper length with a push of the button. Easy to disassemble and wash without tools. 2.25" (5.72cm) diameter.

Item No.	Description
Cutters	Cito Straw Cutters

E

F

Universal Syringe

This stainless steel syringe gun will seat both ½cc (0.5mL) and ¼cc (0.25mL) semen straws, just by changing the direction of the barrel, O-ring style uses slit sheaths with green insert. 17.5" long.

Item No.	Description
D301	Universal Syringe

F

G Infusion Tubes

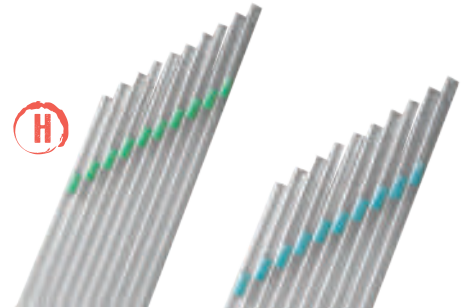

Drilled infusion tubes have one uniquely drilled end which allows for a tight fit with any standard luer-tip syringe, eliminating the need for connector adapters. Made from high quality polymers with round, smooth and polished ends for easier insertion. 25 tubes/bag, 40 bags/case.

Item No.	Description	Case Ct.
AI2100	Infusion Tubes Drilled 21" 25/bag	40

H Sheaths Slit

PVC sheaths designed with an insert that provides a secure seat for a semen straw. Slit to work with O-ring guns. 17.5" long, 0.178" outer diameter.

Item No.	Description	Case Ct.
4405C SYR	Sheaths w/Green Insert/Slit 50/pk	20

I Sheaths Unslit

PVC sheaths designed with an insert that provides a secure seat for a semen straw. Unslit to work with spiral guns. 17.5" long, 0.178" outer diameter.

Item No.	Description	Case Ct.
4505C SYR	Sheaths w/Blue Insert/Unslit 50/pk	20

J Kamar Heat Detector

The Kamar detector is a pressure sensitive device that glues on the tail head of the cow. Requires 3 seconds of pressure to activate detector from white to red. Each box contains 25 detectors, a tube of glue, instructions and plastic applicator.

Code	Category	Description	Count	Case
4999-1180-036	Adhesive	Adhesive Kamar Heat Detector	1	25
4999-1180-034	Detector	Kamar Heat Detectors	25	40

Calving Supplies

Dr. Frank's® Calf Puller

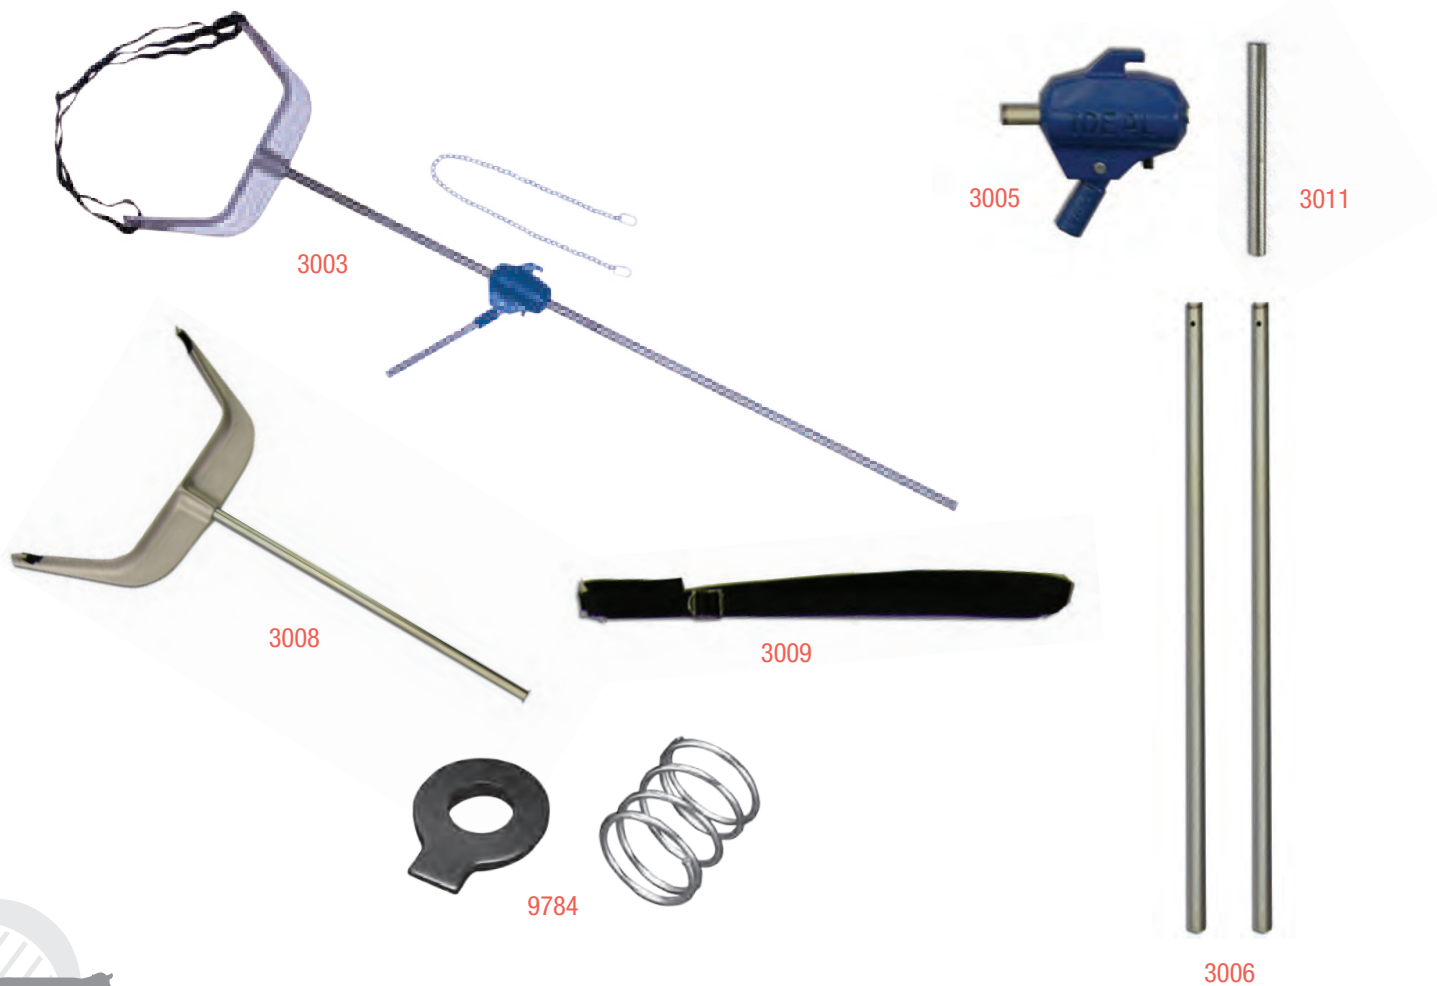

Dr. Frank's Calf Puller is the original obstetrical instrument developed by B.N. Frank, DVM, a specialist in veterinary obstetrics. Dr. Frank's is a precision instrument that has proven its effectiveness year after year in thousands of calving cases.

The uniform tension of this unique fetal extractor does not permit slipping or backing-up of the jack. Traction on the calf and the counter-thrust against the cow induce spreading of the pelvic bones, elevation of the abdomen, and arching of the animal's back, all assisting in the natural birthing process.

The entire unit can easily be assembled in minutes. The smooth rods unscrew for easy storage and cleaning. Dr. Frank's comes packaged with a 45" OB chain. Made in the USA.

Item No.	Description
3003	Dr. Frank's Calf Puller
3005	Jack for Dr. Frank's
3006	72" Rods (pair)
3008	Breechen 23"
3009	Web Strap
3010	Vinyl Carrying Case Dr. Frank's Calf Puller
3011	Jack Handle for Dr. Frank's Calf Puller
9784	Dr. Frank's Cams & Springs Kit

Calf-Eze™ Calf Puller

Calf-Eze is engineered for the user that prefers a dual action pull, or zig-zag motion, instead of a single action pull instrument.

Calf-Eze is superior to ratchet-style pullers that rely on grooved shafts with sharp edges and hard-to-clean grooves. Calf-Eze utilizes the same non-slip cam traction system as the Dr. Frank's Calf Puller, but has two pulling points that alternatively advance to shift the pull from one leg to the other.

The dual-action jack body is made of special strength aluminum and weighs only 17lbs. The jack assembly mechanism allows the user to easily position the jack on the rods and lock it in place. Steel cams prevent slipping and provide longer jack life. A third chain hook is also provided to give a single-pull option.

The Calf-Eze is suggested for use with two 45" OB chains (not included); available as item 3102 - see page 16). Made in the USA.

Item No.	Description
3022	Calf Eze Calf Puller, complete unit
3024	Calf Puller Jack for Calf-Eze
3006	72" Rods (pair)
3008	Breechen 23"
3009	Web Strap
9785	Calf-Eze Cams & Springs Kit

Ratchet-Style Calf Puller

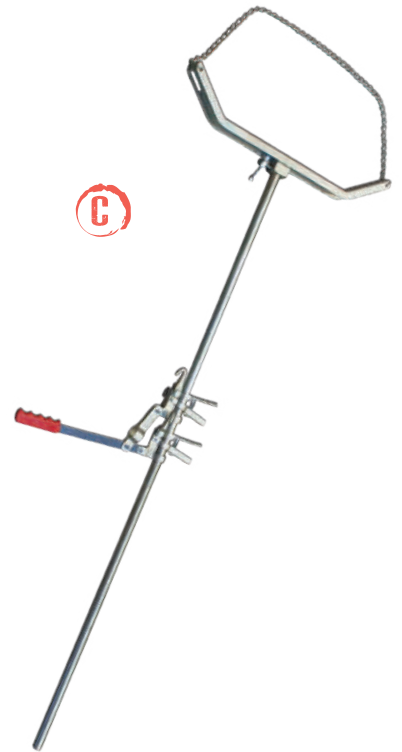

The Ratchet-Style Calf Puller can be your solution to difficult deliveries. Crafted with the finest quality steel, it will stand up to the toughest deliveries without letting you down.

The Ratchet-Style Calf Puller features steel rods that easily disassemble for cleaning and storage. The rods have smooth, clean grooves that lessen wear on the jack and give a much quieter ratchet than competitors' pullers. The jack is extremely durable, and has a large, comfortable handle that allows for single person operation. Large handles also greatly reduce the incidence of breakage, or pinched fingers and hands.

The rods screw into the breechen, which provides stability during the birthing process. The Ratchet-Style Calf Puller comes with a standard 66" rod and has an additional attachment to extend the rod to a full 78".

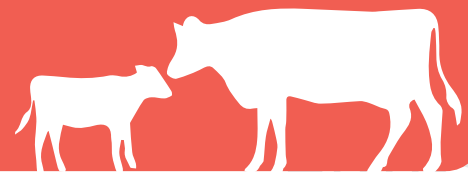

The jack conveniently offers both a zig-zag pull and a single-pull option. Many prefer the zig-zag pull as it helps avoid locking of the calf's shoulders in the pelvic opening.

Item No.	Description
3020	Calf Puller Ratchet Style

Did you know?

Studies consistently show that bull calves require more calving assistance than heifer calves[†].

Calving Supplies (cont.)

D OB Chain and Handles

NEOGEN's high quality OB accessories are a comfortable fit for any delivery. The OB handle is 1/2" in diameter and has a poly coated grip. The larger diameter and comfort grip make those difficult births easier on your hands. The durable, high strength OB chains come in 30", 45" and 60" lengths. Both the chains and handles are zinc-plated with an added rust inhibitor.

Item No.	Description
3104	OB Handle w/Poly Grip ⚠️ WARNING: This product can expose you to chemicals including Di(2-ethylhexyl) Phthalate ("DEHP"), which is known to the State of California to cause cancer and birth defects or other reproductive harm. For more information go to www.P65Warnings.ca.gov .

3101	OB Chain 60"
3102	OB Chain 45"

E OB Strap

Heavy-duty 1" nylon makes our straps weather and mildew resistant. Nickel-plated, welded steel D-rings on both ends. Economical alternative to OB chains. For use with OB Handles.

Item No.	Description
3111	OB Strap Nylon 1"x30"
3112	OB Strap Nylon 1"x60"

F Calf Snare

NEOGEN's Save-a-Calf Snare loop is easily made larger or smaller by simply sliding the yoke. The snare is fabricated from high grade steel cable and has a thimble for use with NEOGEN's OB handle.

Item No.	Description
3108	Calf Snare Save-A-Calf Steel Cable

G Wire Saw

The 27-strand stainless steel wire saw provides easy and quick cutting. Packaged in a reusable plastic dispenser to prevent tangling. Handles come as a pair and are nickel-plated for easy clean-up. Thumb screws lock the wire in place.

Item No.	Description
3115	OB Wire Saw Stainless Steel 32"
3116	OB Wire Saw Handles 1 pr

H Pro-Fix® Button

Designed for internal fixation of vaginal prolapse in a pre-parturient cow, the Pro-Fix button will reduce the prolapse, keep it from recurring and allow for normal parturition without assistance.

Item No.	Description
J100	Pro-Fix Button VPR 1 kt

I Pro-Fix® Tubes

Designed for the repair of rectal prolapse in swine, ovine, and bovine, Pro-Fix Tubes eliminate the stricture problems sometimes associated with reduction methods of treatment. These precision molded, disposable plastic tubes are made in 5/8", 3/4", 1", 1 1/4", 1 1/2" and 2" OD sizes. The tubes are fully tapered on one end for easier insertion and have extra deep center grooves for better retention. The 1 1/2" and 2" OD sizes have holes in the center groove for suturing in place. Pro-Fix Tubes are available in various sizes.

Item No.	Description
R050	Pro-Fix Tubes 5/8" 24ct
R075	Pro-Fix Tubes 3/4" 16ct
R100	Pro-Fix Tubes 1" 12ct
R125	Pro-Fix Tubes 1.25" 16ct
R150	Pro-Fix Tubes 1.5" 16ct
R200	Pro-Fix Tubes 2" 9ct

I

J Vet-Tie™

Vet-Tie Braided Tape is a non-sterile, polyester braided tape developed for use with Pro-Fix Tubes (rectal rings) in repairing rectal prolapse in swine, ovine, and bovine. Available in narrow and wide widths, Vet-Tie can also be used in surgical procedures as a suture material or umbilical tape. Vet-Tie Braided Tape is packaged in a unique plastic vial, which permits dispensing of tape without removing the lid.

Item No.	Description
V125	Vet-Tie Narrow 1/8" 30yds
V375	Vet-Tie Wide 5/16" 30yds

Vet Apron

Large full length Vet Apron with extra-long ties in one-size fits all. Made from a urethane coated nylon oxford material that is highly water resistant and breathable for maximum comfort. Navy blue color and Machine washable. One size fits all.

Item No.	Description
VA400	Vet Apron 1 Size

N

Originally designed for veterinarian use when performing large animal procedures, Ideal's veterinary apparel is made from a urethane coated nylon oxford material. The garments are navy blue in color, highly water resistant, breathable and machine washable. Custom sizes of all garments may be special ordered.

O **Vet Overall**

Designed for veterinary use providing complete protection these Vet Overalls are made from urethane coated nylon oxford material that is highly water resistant and breathable. Straps have Velcro fasteners for a secure fit. Navy Blue color and machine washable. Available in Large & XLarge

Item No.	Description
VA600-L	Vet Overall L
VA600-XL	Vet Overall XL

P **PolyGown**

Made of 1.3 mil lightweight embossed polyethylene film, the Ideal PolyGown is designed for veterinary and livestock applications where minimal protection is needed. PolyGown is packaged in a convenient dispenser box for easy removal and is available in three sizes.

Item No.	Description
DG100-M	PolyGown M 20/bx
DG100-L	PolyGown L 15/bx

Dairy Hygiene

Cleaners & Disinfectants • CIP (Clean-in-Place) & Bulk Tank Cleaners
Acid Detergents • Teat Dips & Udder Washes

Dairy Hygiene

Cleaners & Disinfectants

NEOGEN's line of Dairy Hygiene products for Clean in Place and Bulk Tanks includes both alkaline and acid detergents as well as specialty products for residue and build-up. These products are manufactured in California and Tennessee to maximize freight efficiencies. Tetradyne dairy chemicals are formulated to keep your milking equipment clean and residue free. We offer a variety of strengths that can be used in combinations of daily use and shock treatments as needed. During seasonal changes, our technicians can recommend products to use before you see a problem. Using the alkaline, acidic and sanitizing products in combination, as recommended, will help keep your equipment bacteria counts low and your milk quality high.

Manual Cleaners

Ascend

An economical liquid, high foaming all-purpose cleaner and hand wash.

Item No.	Available Sizes
603122	1 gal, 30 gal, 55 gal

Ascend II

A premium liquid, high foaming general purpose cleaner and hand wash.

Item No.	Available Sizes
680036	1 gal, 15 gal, 55 gal

Tetrabase L8

Chlorinated high foaming cleaner.

Item No.	Available Sizes
602242	5 gal

Tetraspec LX

A high foaming, chlorinated, general purpose, alkaline powder detergent for use as a manual cleaner.

Item No.	Available Sizes
603001	40 lb, 100 lb, 400 lb

Tetracid-700

Foaming Acid cleaner and brightener. Recommended for foaming applications on equipment, floors and walls. Let stand and rinse with high pressure wash.

Item No.	Available Sizes
602056	1 gal, 5 gal

Cleaners & Disinfectants (cont.)

Laundry

F

Tidmore

Concentrated liquid laundry detergent for washing soiled rags in dairy farms.

Item No.	Available Sizes
602120	5 gal

G

Tidmore CL

Chlorinated version of Tidmore.

Item No.	Available Sizes
602291	15 gal, 55 gal, 275 gal

H

Tidet CL

Concentrated with chlorine powder laundry detergent used for the washing of soiled rags in dairy farms.

Item No.	Available Sizes
602289	100 lb, 400 lb

I

Resolve

A liquid organic acid based detergent for the removal of polymeric adhesive residues in pipelines.

Item No.	Available Sizes
652104	5 gal

J

Catalize

A liquid additive containing water softening and chelating agents used primarily for injection into CIP systems to boost cleaner performance on dairies with high water hardness and/or butterfat content.

Item No.	Available Sizes
602206	275 gal

Sanitizers & Disinfectants

A

Coresan 12.5

A 12.5% liquid sodium hypochlorite sanitizer.

Item No.	Available Sizes
650410	5 gal, 15 gal, 55 gal

B

Iodis

An iodine based liquid sanitizer-disinfectant containing 1.75% titratable iodine and phosphoric acid.

Item No.	Available Sizes
433300	1 gal, 30 gal, 55 gal

Mycocide

An effective low foaming detergent sanitizer containing 3.5% iodine and phosphoric acid.

Item No.	Available Sizes
413090	1 gal, 15 gal, 55 gal

CIP (Clean-in-Place) & Bulk Tank Cleaners

Proper and thorough pipeline and bulk tank cleaning is essential milk safety and quality. NEOGEN's selection of high quality cleaners and detergents are designed to perform in any system with exceptional results and are available with chlorinated, non-chlorinated and powdered products.

Cycle One

Two in one detergent to help lower energy and water use and time for wash down.

Low foaming liquid acid cleaner for use as a single cycle spray and CIP cleaning.

Rinse the system with clean water, then drain. Use Cycle One and circulate for 8 to 10 minutes starting at 150° to 160° F and maintain the temperature above 100° F throughout the cleaning cycle, Drain. Sanitize surfaces immediately prior to next milking.

Item No.	Available Sizes
601045	1 gal, 5 gal, 15 gal, 30 gal, 55 gal, 250 and 275 gal totes

Liquid Chlorinated Cleaners

A series of pipeline and bulk tank cleaners containing sodium hydroxide, polymers, water conditioners and chlorinating agent.

Tetrabase-75

A heavy duty liquid alkaline pipeline cleaner containing sodium hydroxide, anti-redeposition polymers, water softening agents, stabilizing and chlorinating agents.

Item No.	Available Sizes
652202	30 gal, 55 gal, 250 gal tote

Tetrabase-100

A liquid alkaline pipeline and bulk tank cleaner containing sodium hydroxide, anti-redeposition polymers, water softening agents, stabilizing agents and a chlorinating agent. Tetrabase-100 cleans and disinfects efficiently while being gentle on milking equipment and liners and works well in hard-water.

Item No.	Available Sizes
652052	15 gal, 30 gal, 55 gal, 250 gal tote

Tetrabase-150

Formulated with potassium hydroxide (for better rinsability), water softening agents, anti-redeposition polymers, dispersants and a chlorinated compound. Effective protein and butter fat removal properties at economical dilution rates.

Item No.	Available Sizes
602038	5 gal, 30 gal

CIP (Clean-in-Place) & Bulk Tank Cleaners

D

Tetrabase-350

Phosphate Free – Heavy duty liquid alkaline pipeline and bulk tank cleaner containing sodium hydroxide, anti-redeposition polymers, water softening agents, stabilizing and chlorinating agents. Recommended for applications where heavy butterfat and oily solids are encountered.

Item No.	Available Sizes
602040	15 gal, 55 gal, 275 gal tote

Non-Chlorinated CIP Cleaners

A series of concentrated, heavy duty pipeline and bulk tank cleaners built with sodium hydroxide, water conditioners and inhibitors.

A

Tetrabase-400

Concentrated heavy duty pipeline and bulk tank cleaner developed to provide maximum hydroxide alkalinity along with dispensing agents, water softeners, wetting agents and iron inhibiting ingredients. Economical alternative.

Item No.	Available Sizes
602098	55 gal, 250 gal tote

B

Tetrabase-70

Developed to provide maximum hydroxide alkalinity along with dispensing agents, water softeners, wetting agents and iron inhibiting ingredients. Economical alternative due to the high dilution rates. Designed for the removal of heavy soils with a high level of water conditioning ability and alkalinity that is easily rinsed after cleaning.

Item No.	Available Sizes
616145	5 gal, 15 gal

Powder CIP Cleaners

A series of pipeline and bulk tank cleaners formulated with sodium hydroxide, water softeners, dispersants and chlorinating agent. Tetrabase-P3 & P4 are the “everyday” workhorse for most CIP cleaning applications.

A

Tetrabase-P3

Blend of alkaline hydroxide builders, water softening agents, dispersants and chlorinated compound. Chlorinated alkaline heavy duty tank cleaner. Excellent butterfat saponification and milk protein soil detergency.

Item No.	Available Sizes
652069	40lb, 100lb, 400lb

Acid Detergents

A

Resolve

Resolve is a liquid organic acid that removes polymeric adhesive residues from pipelines and bulk tanks. If teat sealant is allowed to build up in the system, bacteria can become a problem.

Item No.	Available Sizes
----------	-----------------

652104	5 gal
--------	-------

B

Tetracid

An economical acid blend used as a CIP acid detergent for dairy farm pipeline and bulk tank applications.

Item No.	Available Sizes
----------	-----------------

618087	1 gal, 15 gal, 30 gal, 55 gal, 250 and 275 gal totes
--------	--

Tetracid-500

A versatile blend of phosphoric, nitric, and sulfuric acids used for pipeline and bulk tank cleaning applications.

C

Item No.	Available Sizes
----------	-----------------

652072	15 gal, 30 gal, 55 gal
--------	------------------------

Teat Dips & Udder Washes

NEOGEN's Tetradyne line of pre-dips, post-dips and udder washes help producers combat the economic implications of mastitis. Mastitis not only can result in production loss, but can also effect reproductive efficiency. Our line has a variety of actives and conditioners allowing the dairyman to select the best products to meet his herd health goals and climate conditions.

Iodine Teat Dips (NPE-free)

NU-DYNE Teat Dips are formulated without the use of Nonylphenol Ethoxylates (NPEs) to provide environmentally safe products that eliminate possibilities of NPE residues in milk.

A

Nu-Dyne 102

1% iodine, 2% glycerin, based teat dip solution

Item No.	Available Sizes
----------	-----------------

603132	15 gal, 30 gal, 55 gal, 250 and 275 gal totes
--------	---

B

Nu-Dyne 110

1% iodine, 10% glycerin, based teat dip solution

Item No.	Available Sizes
----------	-----------------

680031	15 gal, 30 gal, 55 gal, 250 and 275 gal totes
--------	---

Teat Dips & Udder Washes (cont.)

C

Nu-Dyne 502

0.5% iodine, 2% glycerin, based teat dip solution

Item No.	Available Sizes
----------	-----------------

680034	30 gal, 55 gal, 250 gal tote
--------	------------------------------

D

Nu-Dyne 505

0.5% iodine, 5% glycerin, based teat dip solution

Item No.	Available Sizes
----------	-----------------

680033	55 gal, 250 and 275 gal totes
--------	-------------------------------

E

Nu-Dyne 7575

0.75% iodine, 7.5% glycerin, based teat dip solution

Item No.	Available Sizes
----------	-----------------

603131	275 gal tote
--------	--------------

Hydrogen Peroxide Teat Dips

Fizzing action makes a good pre-dip, the hydrogen peroxide is sensitive to sunlight and extreme weather, it has a shorter shelf life than Iodine Teat Dips

A

Oxipro

A 1% hydrogen peroxide, 10% glycerin, teat dip solution

Item No.	Available Sizes
----------	-----------------

602126	1 gal, 5 gal, 15 gal, 30 gal, 55 gal, 250 and 275 gal totes
--------	---

B

Oximate

A 0.5% hydrogen peroxide, 5% glycerin, teat dip solution

Item No.	Available Sizes
----------	-----------------

602262	55 gal, 250 gal tote
--------	----------------------

Caprylic/Capric Acid Teat Dip

Organic Acid Teat Dip

A

Dermapro

A 1% caprylic/capric acid blend and 40% propylene glycol teat dip. For extreme winter weather conditions.

Item No.	Available Sizes
----------	-----------------

602259	1 gal, 5 gal, 15 gal, 30 gal, 55 gal, 250 and 275 gal totes
--------	---

Bronopol Teat Dip

Windpro

A 0.2% bronopol, 80% emollients, teat dip for extreme winter weather conditions.

Item No.	Available Sizes
603044	275 gal tote

Barrier Teat Dips

Nu-Force

A 1% iodine, with 10% glycerin, barrier teat dip with a very low drip technology.

Item No.	Available Sizes
633452	5 gal, 15 gal, 55 gal, 250 and 275 gal totes

Tetra Kote

A 0.2% bronopol, 10 glycerin, barrier teat dip with a very low drip technology.

Item No.	Available Sizes
603333	15 gal, 55 gal, 250 gal tote

Udder Washes

Nu-Udder

a 1.75% iodine and phosphoric acid udder wash. Pre-mix one (1) ounce of NU-UDDER with five (5) gallons of water for 25 ppm available iodine. Use a separate towel for each cow and discard towel after applications, then rinse with warm water and examine each quarter with strip cup.

Item No.	Available Sizes
604191	1 gal, 15 gal, 30 gal, 55 gal

Do YOU have a plan to prevent mastitis?

The National Mastitis Council's 10-Point Program:

1. Improve general udder health management at the farm level to decrease the pressure of infection with udder pathogens from older cows to heifers.
2. Control for cross-suckling in calves and young stock.
3. Implement an effective and efficient fly control system.
4. Keep young and primigravid heifers in a clean and hygienic environment and separate from multiparous animals - provide as much attention to this group of animals related to hygiene and cleanliness as spent on lactating animals.
5. Avoid any nutritional deficiency - monitor vitamin E and selenium levels when any doubt exists, especially in relation to clinical mastitis. Zinc, copper and vitamin A play a role as well and could be checked if there is doubt.
6. Minimize the risk of negative energy balance before and after calving through appropriate transition feeding systems.
7. Reduce the incidence of udder edema through optimized peripartum management.
8. Minimize stress around calving (e.g. by not moving heifers to the calving pen when already in labor) and minimize incidence of dystocia and peripartum disease.
9. Consider use of internal teat sealants prepartum where there is a high risk of environmental mastitis in the peripartum period.
10. Use prepartum antibiotic treatment in heifers under certain conditions only:
 - a) under the supervision of the herd veterinarian, within the context of a valid veterinary/client/patient relationship;
 - b) after quantification of the problem and identification of major pathogens (not coagulase-negative staphylococci) as the cause through culturing;
 - c) choice of the antibiotics should be based on antimicrobial susceptibility testing;
 - d) test for residues before every milk delivery;
 - e) upgrading of management at the same time - discontinue treatment as soon as new management strategies become effective.

A Gold Stick™ Fly Traps

- Contains a very effective attractant designed to attract multiple fly species using a combination of food baits
- Attractants are incorporated into the glue, and are cherry-scented
- The color gold has been proven to draw flies, and reflective properties of the metallic surface causes an "open window of light" effect
- To use, simply place traps on window sills or hang them vertically. For use in homes, garages, offices, stables, barns and near garbage cans or containers. Traps may also be used in USDA and FDA inspected facilities.

Item No.	Description	Case qty
963	24" Gold Stick with bait packed 24 traps/display case	24
912	10½" Gold Stick with bait packed 12 traps/display case	12
912R4	10½" Gold Stick with bait 4/pk	24

B Clear Bug and Fly Window Trap

Catchmaster's Clear Bug and Fly Window Trap is safe, non-toxic and easy-to-use. The nearly invisible trap mounts quickly to the window and traps flies where they hang out the most.

Item No.	Description	Case qty
904	Clear Bug and Fly Window Trap 4/pk, 24/display case	24

C Scented Bug and Fly Catcher Fly Ribbon

Specially formulated and scented, these bug and fly catchers are for household, farm and non-food commercial use. Measures 1½" x 25".

Item No.	Description	Case qty
9144M4	Fly Ribbon 4/pk	24
9144B4	Fly Ribbon Bulk 96/pk	4

D Fly Bag Trap

Our Fly Bag Trap is easy to use, just add water and the attractant dissolves. This specially formulated lure is designed to attract a broad range of fly species and is long-lasting. Features a safety locking cap.

Item No.	Description	Case qty
975-12	Fly Bag Trap	12

Insect Control (cont.)

Did you know?

Dense horn fly populations can negatively impact milk production in pastured cows by 20 percent. †

When fly populations reach high levels, normal grazing patterns are altered as cattle attempt to gain relief from horn fly infestation and the following can be observed: ††

- Less feeding time
- More traveling
- More tail switching
- Congregating in groups
- Congregating in water

E Spider Web™ Fly Glue Trap

One Spider Web trap can catch more than 100,000 flies! With over 6,000 square inches of surface area, this double-sided fly trap was designed to tackle the most severe fly infestations. Attractants include food grade, multi-bait, and a fluorescent chartreuse color. University tests have shown that when the Spider Web Fly Glue Trap is used at a rate of one trap per 600 square feet, high infestation areas were able to achieve 70–80% control without any use of pesticides.

Item No.	Description	Case qty
930	Spider Web Fly Glue Trap	12

E

F Giant Fly Trap Roll

One-sided adhesive sheet with 3,600 square inches of fly catching surface. Each roll is 30' long and features a pre-baited scent as well as an alluring fluorescent chartreuse color. Use in animal health facilities, barns, waste rooms and other high infestation areas.

Item No.	Description	Case Ct.
931	Giant Fly Trap Roll	12

F

G Giant Fly Glue Trap

One-sided adhesive board with capacity to hold thousands of flies. 24" x 12". For use in barns. Environmentally safe, non-poisonous, long lasting and easy to use.

Item No.	Description	Case Ct.
948	Giant Fly Glue Traps	48

G

H Fly Control String

Best Value! Non-toxic, environment friendly, the trap works all year round in the stable, milking room and barn. The roll with fly repellent is placed at ceiling height. When the string is full, replace it with the refill. Refill fits any other holder on the market.

Code	Description	Count	Case
4999-1050-184	Fly Control String 500m w/Hardware	1	1

Insect Control (cont.)

Prozap provides a complete line of aerosols, ready-to-use liquids, concentrates and dust products to meet the needs of livestock producers, horse owners, pet owners and professional pest control operators alike. Whether you are spraying your yard for mosquitoes, controlling horn flies on cattle or combating pesky stable flies on horses, NEOGEN's Prozap line has you covered. Utilizing proven active ingredients including Pyrethrin, Permethrin and Vapona, Prozap provides the end user several choices of control to solve any insect problem.

Dy-Fly® Aerosol

- Dy-Fly Aerosol Insecticide provides instant knock-down and kill of flying and crawling insects in homes and on farms
- Contains .5% Pyrethrin and 5% PBO
- For use as a premise spray or directly on animals
- Controls flies, mosquitoes, gnats, moths, ants, hornets, wasps, spiders, roaches and other insects
- For use in dairies, animal quarters, milk rooms and poultry houses
- Approved for use in homes and food processing areas

Item No.	Description	Case Ct.
0693510	Prozap Dy-Fly Dairy Aerosol 20 oz	6
0690010	Prozap Dy-Fly Dairy Aerosol 25 oz	6

LD-44®Z

- LD-44Z Insect Fogger kills and repels Flies, Mosquitoes and Lice
- Contains .5% Pyrethrin and 4% PBO
- Controls flies, mosquitoes, wasps, gnats, lady Asian beetles, roaches, spiders, plus 19 other flying and crawling insects
- For use in barns, milk rooms, parlors and other buildings

Item No.	Description	Case Ct.
1453510	Prozap LD-44Z Insect Fogger 20 oz	6
1450010	Prozap LD-44Z Insect Fogger 25 oz	6

CT-75 Dairy Aerosol

- CT-75 Dairy Aerosol provides immediate and effective control of insects
- Contains .7% Pyrethrins, 5% PBO
- For use as a fogger in milking parlors, milk rooms, barns, food processing areas and in stored product spaces
- Can be used around, and directly on, lactating and non-lactating dairy cattle
- Controls house flies, horn flies, stable flies, gnats, mosquitoes, small flying moths and other insects

Item No.	Description	Case Ct.
0720210	Prozap CT-75 Dairy Aerosol 26 oz	6

Pro-Mist'r CT-7 Metered Dispenser

- For use with Prozap LD-44T™ Metered Insecticide or Prozap Fragrances
- Features power switch display, 24 hour or day only operation and three spray interval selection
- When set at 15 minute intervals will provide up to 30 days of coverage per refill
- Accepts most metered aerosols
- Uses "D" size batteries

Item No.	Description	Case Ct.
CT79500	ProMist'r Dispenser	6

LD-44T™ Metered Insecticide Refill

- Contains 1% Pyrethrins, 2% PBO and 3% 264
- 6.5 oz can lasts up to 30 days in the Pro-Mist'r Metered Dispenser
- Covers 6,000 cubic feet of space
- Fits most automatic dispensers
- Controls flies, mosquitoes, gnats and moths
- For use in food warehouses, dairies, barns and parlors

Item No.	Description	Case Ct.
73010	Prozap LD-44T Metered Insecticide Refill 6.5oz	12

Insectrin® X Concentrate

- Insectrin X Concentrate is a broad spectrum, multi-use insecticide that kills fast and has residual action
- Contains 10% Permethrin
- For use on livestock, animal premises, lawns and ornamentals
- **Approved for use on lactating and non-lactating dairy cattle**
- Mix with water or oil for use as a spray
- Mix with oil for cattle backrubber use to control horn flies, face flies, horseflies, ticks and ear ticks

Item No.	Description	Case Ct.

Prozap® Bovi-Rub

The Prozap Bovi-Rub back rubber is designed for effective and economical control of flies, grubs, lice and ticks on cattle and other livestock. Superior insecticide charging with wicking action allows for low-stress application of insecticides on cattle and other livestock. Hang near water, mineral feeders or in alley ways to encourage use. Initially charge the Bovi-Rub back rubber with 2.5 to 5 gallons of solution and recharge as necessary to maintain wetness. Use Prozap insecticides for optimal results.

Item No.	Description	Case Ct.
5079610	Prozap Bovi-Rub 10 ft	2
5079710	Prozap Bovi-Rub 5 ft	4

Prozap® Bovi-Bullets

The Prozap Bovi-Bullet face rub is designed for effective and economical control of face flies, horn flies, lice and ticks on cattle and other livestock. With a metal ring for easy hanging, the Bovi-Bullet is ideal for use in mineral feeders. Superior insecticide charging and wicking action allows for low-stress application of insecticides on cattle. Initially charge the Bovi-Bullet with 1 liter of solution and recharge as necessary to maintain wetness. Use Prozap insecticides for optimal results.

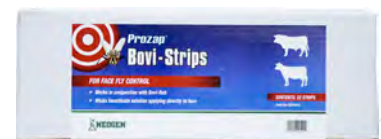

Item No.	Description	Case Ct.

Rodent Control

Control rats and mice in and around your facilities

NEOGEN's Rotational Baiting Program

Did you know that one rat can eat more than 20 pounds of feed per year? Or that rodents carry more than 20 disease causing pathogens for livestock? Farm facilities also suffer when rodents are present, as they can cause serious damage to insulation, structure foundation and electrical wiring.

Major pathogens transmitted by rodents which post a threat to livestock or human health

PATHOGEN	DISEASE	ROUTE OF TRANSMISSION

Ramik® Oats

RESTRICTED USE

Ramik Oats is a food-grade bait that mimicks squirrels natural food source. For control of California ground squirrels ONLY.

Item No.	Description	Case Ct.
116390	Ramik Oats 30lb bucket	1

Rodent Control (cont.)

Second generation anticoagulant: Brodifacoum

Brodifacoum is the strongest anti-coagulant rodenticide available. Havoc products combine brodifacoum with a special mixture of highly attractive bait ingredients along with patented food processing techniques. The result is a superior, single-feed rodenticide in a unique bait delivery system.

- Controls Norway rats, roof rats and house mice —may kill both rats and mice in a single night's feeding
- Available in chunks, pellets, block and meal bait configurations
- XT-Block Contains Bitrex®, a child and non-target deterrent

Havoc® Attack Blocks

- Highly palatable, second generation anticoagulant specially formulated for use by livestock and poultry producers.
- Unique blend of emulsifying agents that allow for a better blend (which equals higher palatability) of ingredients.
- All-weather bait block with great heat tolerance

Item No.	Description	Case Ct.
116393	Havoc Attack Blocks 10lb Bucket	4
116394	Havoc Attack Blocks 20lb Bucket	1

Havoc®-XT Blok

- Weather-resistant blocks
- Unique shape makes it easy for rats and mice to gnaw on
- Available in a resealable pouch, designed to maintain bait freshness
- Larger bulk sizes available for frequent use

Item No.	Description	Case Ct.
116362	Havoc-XT Blok 8lb resealable pouch	4

Havoc® Rodenticide Bait

The food-grade ingredients in Havoc Rodenticide Bait provide superior palatability to deliver brodifacoum. This meal bait product contains food-grade ingredients, seeds and grains, which provide rodents a variety of textures and flavors.

Specially formulated bait that includes highly palatable food-grade rolled oats
Just a teaspoon amount will control house mice, Norway rats and roof rats

- Contains 0.005% Brodifacoum- strongest single feed second generation active available
- Meal baits are excellent for use where competing food or feed sources are present
- Use as a supplement to NEOGEN's recommended Rotational Baiting Strategy - during periods of heavy rodent infestation.

Item No.	Description	Case Ct.
116395	Havoc Rodenticide Bait 25lb Bag	1

116396	Havoc Rodenticide Bait 50lb Bag	1

116395

116398

Acute Toxicant: Bromethalin

Bromethalin was developed to combat a world-wide perceived problem of rodent resistance to warfarin-like anticoagulant rodenticides. A highly potent neurotoxin rodenticide that provides a lethal dose to rodents in a single feeding. Bromethalin attacks the central nervous system; rodents usually consume a lethal dose within a single night's feeding, with the first dead rodents appearing within 2 days. Available in bait blocks or place packs.

- Fast acting—bait today and see results tomorrow!
- Palatable bait is preferred over most feeds, food sources and competitive baits
- Rodents stop feeding after consuming a lethal dose; this results in a consumption of 80% less bait than with traditional baits
- No known resistance, neurotoxicant formulation
- Reduced risk of secondary toxicity
- Use as part of NEOGEN's recommended Rotational Baiting Program

CyKill™ Place Packs (Pellets)

- Paper pouches contain pellets for effective rodent control
- No need to open pouches; rodents eat through the package
- Each pouch contains .75oz of pelleted bait

Item No.	Description	Case Ct.
112835	CyKill .75oz Place Packs 100 pks/pail	4

CyKill™ Blocks

- Multiple gnawing edges
- Highly palatable formulation
- Blocks may be placed in sewers and other damp environments

Item No.	Description	Case Ct.
112830	CyKill 0.75oz Blocks 9lb pail 192 count	4
112825	CyKill 0.75oz Blocks 4lb pouch 86 count	4

Rodent Control (cont.)

Second Generation Anticoagulant: Bromadiolone

NEOGEN's newest rodenticide bait includes the active Bromadiolone, a proven and effective second generation active. Rats, mice and meadow voles may consume a lethal dose in a single night's feeding, with the first dead rodents appearing four to five days after feeding begins.

DeciMax® Blocks

- All-weather formulation reduces the risk of ruined bait
- Food grade ingredients including grains and seeds provide an irresistible formulation for effective control in most environments
- Ridges on 1 oz blocks encourages gnawing and improves consumption

Item No.	Description	Case Ct.	Pallet Qty.
116850	DeciMax Blocks 144 x 1 oz (9 lb) Pail	4	80
116855	DeciMax Blocks 288 x 1 oz (18 lb) Pail	4	36

DeciMax® Place Packs

- Place packs offer a convenient no-touch bait placement for hard to reach areas
- Pellets inside packs are formulated with food grade material to improve palatability
- 8 lb pail offers 86 - 1.5 oz place packs

Item No.	Description	Case Ct.	Pallet Qty.
116845	DeciMax Pellets (86 x 1.5 oz) PP (8 lb) Pail	4	80

DeciMax® Soft Bait

- Highly palatable soft bait manufactured with the highest quality food grade ingredients
- Soft baits are made without wax to ensure more active per placement and high acceptance
- High performance in cold or hot weather conditions
- 10 gram sachets are packaged inside plastic bags within pail to maintain freshness

Item No.	Description	Case Ct.	Pallet Qty.
116841	DeciMax Soft Bait 8 lb Pail	4	144
116840	DeciMax Soft Bait 22 lb Pail	1	48

Zinc Phosphide Tracking Powder

Tracking Powder Baits are designed to be picked up on the foot pads, fur, and/or tails of rodents during their travels and ingested during the rodent's daily grooming activities. Prozap Tracking Powder is a formulation of 10% Zinc Phosphide and corn starch which is an excellent carrier that adheres to the rodent effectively. Acute toxicants like Zinc Phosphide, require only one grooming to kill and quickly reduce rodent populations when a tolerance to anticoagulants exists.

Prozap Zinc Phosphide Tracking Powder

RESTRICTED USE PRODUCT

- Powerful tracking powder using the acute active of 10% Zinc Phosphide
- Just teaspoon amounts will control Mice
- Rodents ingest toxicant while grooming making tracking powder an excellent tool when a tolerance to anticoagulants exists
- Tracking powder works especially well when rodents have extensive food supplies or will not accept other baits
- Dead rodents could appear within hours

Item No.	Description	Case Ct.	Pallet Qty.
112846	Prozap Zinc Phosphide Tracking Powder (25 lb) Pail	1	36

Rodent Control (cont.)

1st generation anticoagulant: Warfarin

Microencapsulated warfarin, a hydroxycoumarin anticoagulant rodenticide, is contained in all Rodex bait formulations. In early research trials, rat acceptance of microencapsulated warfarin baits was 3 to 10 times greater than uncoated warfarin baits. This anticoagulant is a multi-feed chronic rodenticide, and is considered the lowest hazard to non-target animals of any anti-coagulant rodenticide. Rodex bait formulations are available in pellets and blocks.

Rodex™ Pelleted Bait-1

- Kills rats and mice; reduced risk to non-target animals
- Micro-encapsulated warfarin reduces bait shyness
- Available in a resealable pouch to maintain bait freshness

Item No.	Description	Case Ct.
116348	Rodex Pelleted Bait-1 4lb resealable pouch	4

Rodex™ Blox-1™

- Kills rats and mice; reduced risk to non-target animals
- Micro-encapsulated warfarin block is moisture-resistant
- Each 1 lb block breaks easily into smaller pieces
- Convenient “grab and go” 4lb box

Item No.	Description	Case Ct.
116349	Rodex Blox-1 4x16oz bars	4

A 1,000 cow herd with 5% rodent contamination loses more than \$85,000 in feed contamination every year†.

Use NEOGEN's 4-step program to control rodents in and around your facilities.

Step 1. Prevent: Clean, clear, and implement preventative measures.

Step 2. Identify: Find the location and severity of the problem.

Step 3. Execute: Implement baiting strategy according to target rodents and locations.

Step 4. Monitor: Monitor the effectiveness of your program with record keeping. Frequency of baiting should change with increased activity.

†Costs of Major Inputs National Average Dairy Feed Costs." Monthly Data. N.p., n.d. Web. 23 Feb. 2015.

Specialty Disinfectants

A

BioSentry® Universal Barn Cleaner

BioSentry Universal Barn Cleaner is a biodegradable, effective general-purpose cleaner for use dairy barns, farm premises and hutches. Compatible in use with phenolic, quaternary, chlorinated, peroxide and iodine disinfectants. Quickly removes grime, grease, protein and fatty oils.

Active: Surfactant and chelating agent

Use: General purpose alkaline foaming cleaner for farm premise and housing facilities

Activity: Removes grime, grease, proteins and fatty soils

Application: Foaming, high pressure washing or manual cleaning

B

Synergize®

Synergize is a multi-purpose disinfectant-cleaner formulated for use in animal and poultry housing facilities. It is also formulated for use on the following equipment in these facilities: waterers, feeders, hauling vehicles and equipment, farrowing barns, nurseries, blocks, creep areas and chutes. Synergize is also for use in farm premise, equine facilities, calf pens and farm vehicles.

Active: Quaternary ammonium/glutaraldehyde

Use: Veterinary clinics, animal care facilities, calf pens, vehicles, etc.

Activity: Kills gram-negative and gram-positive bacteria, viruses and fungi

Application: Mechanical sprayer, fogging, soaking, use in boot baths and vehicles

Water Treatment

Did you know?

Managing water quality and quantity is one of the most overlooked management practices in livestock production. Clean water plays an important role in digestion and nutrient absorption, and is essential for many physiochemical reactions needed for optimal growth and production.

A

NeoKlor™

AquaPrime® NeoKlor is a 7.5% Sodium Chlorite solution that is EPA approved for usage in potable water disinfection. AquaPrime® NeoKlor has numerous uses in potable water, can be utilized for food plant process, poultry process water, CIP disinfection, industrial cooling water, and wastewater systems.

Active: Sodium Chlorite

Use: Disinfection of potable water found on poultry, swine, and cattle production sites, dairies, food plant processing, poultry process water, industrial cooling

Application: Closed generation system, acid-chlorite chlorine dioxide systems, or other potable water applications.

B

BioSentry® AquaPrime® Activator

Biosentry AquaPrime Activator is a special blend of mineral and organic acids specifically formulated to activate Anthium Dioxide® for the disinfection of livestock drinking water. Formulated specifically for use with 5% stabilized sodium chloride solutions to maximize conversion. An easy 1 part activator to 2 parts 5% sodium chloride solution mix will give an over 90% conversion to free ClO_2 . Efficient conversion creates a least cost application when calculating treatment cost per gallon of water or per animal. Liquid is ready to use and includes a green color to indicate presence in injection lines to ensure proper proportioning.

Disease Diagnostics

Production of PI Calves: Two Routes of Transmission

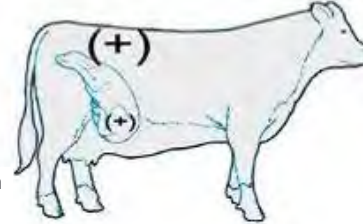

More common route
(Over 90%)

Susceptible pregnant female (non-PI) infected with BVDV at about 1.5-4 months of gestation

Less common route
(Less than 10%)

BVDV persistently infected (PI) female becomes pregnant

BVD virus from any source

BVDV persistently infected (PI) calf is produced

PI calf

¹Loneragan; *Journal of the American Veterinary Medical Association*, 2005

Disease Diagnostics (cont.)

Bovine viral diarrhea is one of the most costly pathogenic viruses in the dairy world, and early identification of persistent infection cases is key to preserving the integrity of your herd's health. It is widely observed that BVDV-PI cattle are not only more likely to become chronically ill or die than non-BVDV-PI cattle, but they are able to shed virus to other animals and bred cows are able to vertically infect a fetus¹.

BVD diagnostic testing can be done as a standalone service, or as an add-on to any sample submitted for the Igenity Dairy Heifer Program. If an animal tests positive for BVD-PI, the sample will not continue on for genomic testing. This ensures that you are only paying for genomic profiles on animals most likely to become superior females. GeneSeek's laboratory is ISO 17025 accredited by the American Association on Laboratory Accreditation.

Johne's: \$4.50

Johne's disease can be controlled and even eliminated from infected herds, however, it takes a thorough understanding of the disease by animal owners, consultation with a veterinarian, and requires use of one or more of the available diagnostic tests. Half-hearted attempts to control Johne's disease will generally fail. Control of Johne's disease also takes time and a strong commitment to management practices focused on keeping young animals away from contaminated manure, milk, water, etc. A typical herd clean up program may take 5 years or longer[†].

The basics of control are simple: new infections must be prevented, and animals with the infection must be identified and removed from the herd.

Johne's Disease: Only the Tip of the Iceberg is Showing

Johne's Disease Stage 3

Clinically Infected animals often suffer from weight loss, decreased production and are suffering from symptoms of Johne's Disease.

Johne's Disease Stage 2

Subclinical animals often show no symptoms, but are actively shedding MAP (*Mycobacterium avium* ss. *Paratuberculosis*).

Johne's Disease Stage 1

Animals show no clinical symptoms and are not shedding MAP. Typically young stock.

Needles & Syringes

Ideal® D3™ Detectable Needles

Durable. Detectable. Dependable.

Durability

Superior durability; thick wall cannula and plated brass hubs reduce breakage 6-fold over conventional needles

Detectability

- 100% detectable in metal detection systems vs. only 15% for standard needles

Sharpness

- Precision-ground tip stays sharper longer, allowing for multiple injections without burring

Packaging Features

- Gauge stamped on hub and packed in red cartridges and boxes for easy identification
- Cartridges are tamper-evident and labeled with needle size and lot number

NEOGEN's line of syringes offers a broad spectrum of solutions to the animal health industry. From disposable syringes used in one time settings, to durable syringes built to last in the most rigorous animal production environments, NEOGEN has a variety of syringes available for any job.

Needles & Syringes (cont.)

Ideal's disposable syringes are made specifically for the animal health industry. The syringes and combos are offered in Premium Hard Packs and Standard Soft Pack packaging. Ideal syringes feature a clear polypropylene barrel and large easy to read graduations to help minimize dosing errors. The combos offer ultra-sharp needles and are ISO color coded to indicate gauge for easy identification.

Premium (Hard Packed) Disposable Syringes

Premium Syringe Features

- Latex-free
- Clear polypropylene barrel for easy viewing of fluid levels
- Large, easy-to-read graduations
- Positive plunger stop allows for maximum filling and eliminates costly spills
- Serrated thumb press for positive grip

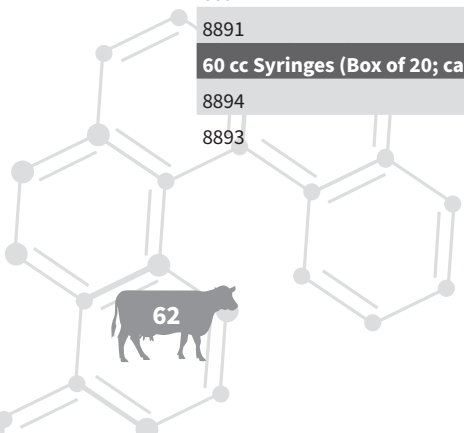

Premium Needle Features

- Ultra-sharp, tri-beveled, anti-coring tips
- Metal inserts to increase strength for animal health applications

Premium Packaging Features

- Hard pack design for veterinary office or field use
- ISO color-coded cartridge caps for easy gauge identification
- Sonic-welded end cap provides tamper-evident seal and ensures sterility
- Product information sticker on box and case box for easy inventory control

- Large, easy-to-read graduations
- Positive plunger stop allows for maximum filling and eliminates costly spills
- Medical grade silicone lubricant inside barrel for smooth, accurate delivery
- Serrated thumb press for positive grip

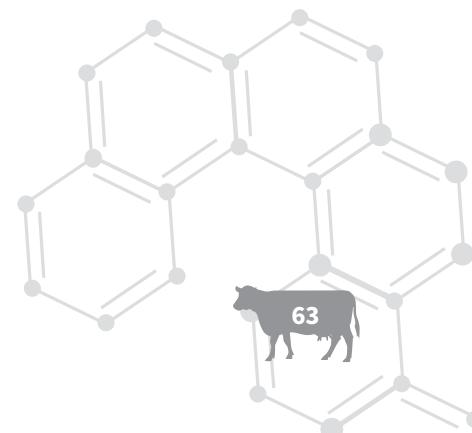

Standard Needle Features

- Ultra-sharp, tri-beveled, anti-coring tips
- Translucent ISO color-coded hubs for easy viewing of flashback and quick gauge identification in or out of the packaging
- Anti-friction coating for minimal penetration resistance and animal discomfort

Standard Packaging Features

- Paper-to-plastic packaging is tamper-evident and ensures sterility
- Product information sticker on box and case box for easy inventory control
- Each syringe/combo has UPC, lot number, manufacture and expiration date printed on package

Hoof Care

Hoof care is essential and NEOGEN provides a wide variety of quality hoof care tools and products to keep your cattle, horses, swine, sheep or goats moving soundly. Whether you are a professional hoof trimmer, farrier, producer or hobby farmer you can find what you need in NEOGEN's hoof and leg care product line-up. This includes trusted brand names such as Easy Bloc, Demotec 95, SureBond, SyrFlex and Burgon & Ball – all known for their quality in every sense of the word.

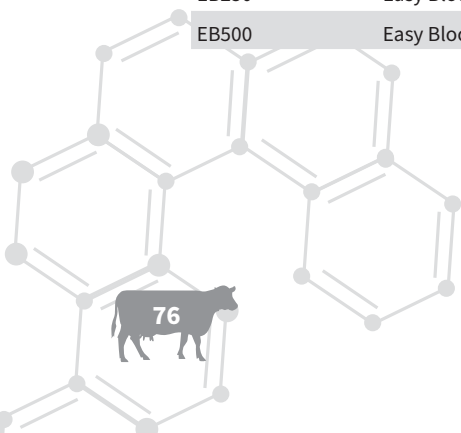

Demotec® Easy Bloc®

Easy Bloc is a unique innovation in hoof treatment. Hoof problems can have very adverse effects on both milk yields and weight gain. The Easy Bloc system was designed to minimize lameness and provide a fast, easy to use "cure" at a reasonable cost.

Incorporating features of similar devices, and a patented off-set toe, Easy Bloc is a plastic slip-on boot which fits onto the healthy claw, taking weight off the affected claw, providing immediate relief of pain and substantial increase in milk production. Easy Bloc was designed by leading hoof-care specialists from around the world and has unique features not available with other hoof blocking systems. Easy Bloc is available in kits of 4, 12, or 36 applications and in standard and extra-long lengths. Sets in approximately 5 minutes.

- Easy to use, even by inexperienced personnel
- Fits nearly all size cows
- Optimum design avoids all possible pressure points
- Mix the resin in the block itself, then press onto the claw
- Flexible cover ensures a good fit
- Affordable price

B**Demotec® 95**

Demotec 95 is a special resin developed for treatment of lameness in cattle. This resin material has superior plasticity without being sticky and can be processed only a few seconds after mixing. Bonding a wooden block onto the good claw of a bovine hoof relieves pain and reduces lameness. The wooden blocks are available in two lengths and come in kits of 2 or 14 applications. Items can also be purchased separately. Demotec 95 resin can also be used by veterinarians, horse owners and farriers for repairing numerous other hoof problems and for splintering pet fractures.

Trimming Discs

Manufactured in Germany of high grade aluminum, the Trimming Disc is lightweight, yet durable. The Trimming Disc is ideal for situations where a less aggressive, easy to handle disc is preferred. Fits most standard hand-held grinders.

- Trims up to 220 head (880 hooves) per disc
- Lightweight aluminum construction allows for easier control
- Blades are manufactured of tungsten carbide and are double-sided for extended use
- Unique wheel design allows for gentle hoof cutting without smells, dust or heat
- Reduces trimming time at a very low cost per animal

E-Z Copper

E-Z Copper aids in the prevention and treatment of hairy wart and foot rot. E-Z Copper is formulated to energize footbath solutions and reduce the use of copper sulfate crystals. Reduce the hassles of heavy bags with the ease of liquid E-Z Copper. Its ionized copper helps condition feet and hoof material, yet it is mild and non-damaging to surrounding skin tissue. Read and follow all label recommendations prior to use. Initial application use 1-gallon E-Z Copper with 20 lbs copper sulfate with 50 gallons of water.

4999-1110-553	Hoof Treatment E-Z Copper 5gal	1	1

QuickHit Concentrate

QuickHit concentrate is formulated to be an aid in the treatment of hairy warts (Papillomatous Digital Dermatitis) in dairy cattle. QuickHit is a highly concentrated product developed specifically for treatment of existing warts. For dairymen who have a high incidence of warts in their herds and need to rapidly get the problem under control. Contains both copper and zinc, adding health benefits not found in other competitive products. Use QuickHit as a direct topical spray on the hairy wart. Clean the hoof and use full strength. Spray to the point of runoff twice a day. Continue to spray for four or five days. Severe hairy wart cases may be wrapped with cotton or gauze soaked with QuickHit. After treatment follow a prevention program using Healthy Foot and E-Z Copper. **Special formulation required in Canada, see product listing below.**

Sure Stop Plus

Hoof bath liquid additive solution enhanced with copper sulfate.

Code	Description
680011	SURE STOP PLUS is a hoof bath liquid additive with extra acidity and copper sulfate.

Handling & Identification

Animals should always be handled in a calm, controlled and gentle manner. Electric prods should be used judiciously and only in extreme circumstances when all other techniques have failed. Electrical devices should never be applied to sensitive parts of the animal such as the face, genitalia, or mucous membranes.

Always use electric prods in accordance with Dairy Quality Assurance™ standards

Bull Leads

Place lead into the animal's nostrils and close gently. Secure handles with the 13 1/2" nickel-plated metal chain. Lead animal by the chain or handles.

Item No.	Description	Case Ct.
7000	Bull Lead w/o Chain	12
7001	Bull Lead w/Chain	12

Bull Ring

Ideal's 3" brass bull ring is self-piercing and durable. A long, sharp piercing point ensures a clean cut. Locks in place with a break-off screw.

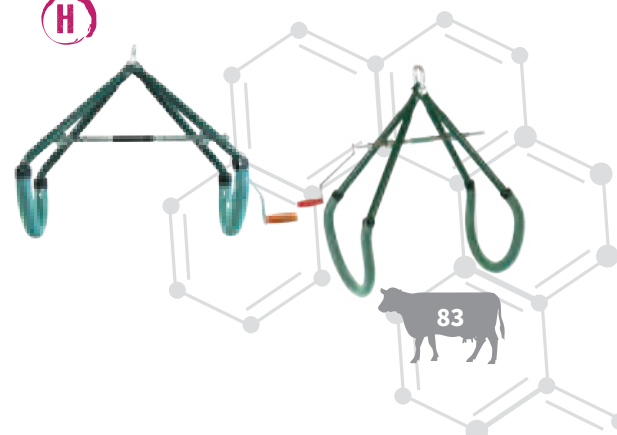

Item No.	Description	Case Ct.
7002	Bull Ring 3"	12

Cow Lift

For cows that cannot stand up on their own, such as right after giving birth. The gummed clamps are adjustable to the cow's size. The lift is placed over the cow's hips and tightened as necessary by cranking the handle, which secures the cow as she is lifted. This enables the cow to regain the use of her legs so she can be milked or treated.

Item No.	Description
TA1800	Cow Lift - up to 2,000lbs / 900kg
TA1805	Cow Lift - up to 3,300lbs / 1,500kg

Handling & ID (cont.)

Z-Tag

Z's revolutionary design and the reason for its growing popularity are as easy to see as the tags themselves. Unmatched tag retention. Guaranteed to stay in longer than any other ear tag system. The neck of the tag is flexible to give if it catches on wire or bush. It simply slides off rather than breaking or pulling out of the ear like other brands. Superior readability non-fade numbers. A special hot-stamp printing process etches numbers deep into the tag panel for long-term legibility. The one-piece design makes it fast and simple to use. The built-in cutting tip makes a small incision that heals quickly and snugly around the tag. Easier to put in. No more torn ears. No other tag is so easy to load or apply. Slip the one-piece tag over the pin, hold the applicator over the ear, squeeze and the tag is in to stay. If the animal jerks away the tag goes in. The pin swivels out in the direction of the movement.

Parlor Supplies

Udder Health

Did you know?

The sensitive skin on the udder is exposed to environmental changes, including moisture and changing temperatures. Because of this the skin can easily become dry, chapped and sore. Cracks and chaffing can harbor bacteria, decreasing parlor hygiene effectiveness and possibly increasing the chances of mastitis. NEOGEN's udder care products provide soothing, moisturizing and healing properties of natural mint oils, aloe, lanolin and Vitamin E for cow health and comfort.

A

Udder Balm

Topical Udder Cream

Udder Balm aids in protection against the effects of extreme weather conditions. Daily application of Udder Balm aids in soothing and softening chapped and irritated skin. Udder Balm is recommended for use on teats, udders, and other skin areas that are exposed to frequent washing and temperature changes.

Item No.	Description	Case Ct.
79247	Udder Balm 4 oz Tube	12
79248	Udder Balm 1 lb	12

B

Dynamint Udder Care

Dynamint's action is natural, being a blend of many ingredients recognized for centuries as having therapeutic action. Peppermint oil is a stimulant and fly repellent. Eucalyptus oil is a stimulant and rubefacient. Calendula oil has a softening action, encouraging good, soft, supple skin condition and helps prevent chapping. Tea-tree oil is anti-microbial and acts as a skin cleanser. The emulsion base has moisturizing qualities. The non-greasy, water-based cream is smooth, light and applies quickly and easily.

The Thrifty Dipper 150

Paints teats from upper chamber providing 100% teat coverage. Dip comes directly to fill the brushes through channels in the upper chamber. Low Maintenance. Post Dipper: has larger channels for higher viscosity dips, and brush that will allow milked out teats to pass through. Pre dipper has smaller channels for light viscosity dips and brush that will last longer for teats full of milk.

WinterSet Powdered Frost Healant

During the winter season the teat surface of dairy animals is subject to added exposure especially when liquid teat dips are used. Liquid teat dips can cause chapping and freezing of the teat. WinterSet is an effective frost and tissue healant with a germicidal agent that reduces bacteria and causes cells involved in healing to migrate more rapidly toward wounds. This powdered product is composed of all natural food grade ingredients with both bactericidal and healing qualities. **Approved for U.S. only.**

B

C Milk Check Filters

Milk Check Filters work better because of better filtration. The micro sized pores in the fabric used are evenly distributed to provide superior filtration. Made of a polyester fabric called "Reemay" which provides a very high wet strength. All the seams are sonically "welded". This eliminates the glue strip and needle holes. Milk Check filters do not contain any resin or glue. All sizes packed 4 boxes per case.

Code	Category	Description	Unit	Count

Techno Boots

Techno Boots Troya polyurethane boots offer superior comfort, durability, cost savings and safety. Designed for long and intensive use.

- Resistant to oils, fats, manure, acid and chemicals
- Elastopan polyurethane from BASF material make the boots lightweight and thermally insulating. It also provides flexibility and strength.
- Up to 35% lighter than PVCs or rubber boots
- Superior comfort guaranteed
- 3-4 times more durable than PVC or rubber boots due to the abrasion-resistant outer sole
- Memory foam insole which takes the shape of your foot
 - Anti-bacterial
 - Anti-static
 - Washable and fast-drying
 - Odor-resistant
- Kick-off Spur - Boots are easily removable
- Exceptional grip in extreme environments avoids slips and falls

Hudson Water Valve

The Hudson valve's unique design operates using a patented float system. The fluid level forces the float to rise and close the diaphragm chamber. The diaphragm then expands to stop the incoming flow. Repair kit contains: retainer ring, control chamber, diaphragm w/ stem and strainer, float, and screen. Use of this valve will restrict G.P.M. by 20%.

A plastic strip cup with black plastic screen for detecting mastitis. Screen is easily removed by pushing down on thumb rest.

Code	Category	Description	Count	Case
4999-1180-030	Strip Cup	Blue Plas. w/Black Insert	1	300

C

D

Ambic In-Line Milk Sampler

Sampling of milk gives important information that can help dairy farms be more profitable. Checking individual cow milk for high somatic cell counts is the best way of identifying problem cows. The Ambic sampler is a stand-alone in line sampler that can be used with any brand of milking equipment. It uses vacuum to pull a representative sample from each claw. The sampler comes with an easy on and off rubber connection. When the cow is finished milking, remove the bottle and pour sample into approved vial and re-install sample bottle. Sampler comes complete with body, 200mL collection bottle, plastic mounting bracket, cable tie and instructions. Key Benefits: Takes up to a 200mL sample. Low cost stand-alone milk sampler. Simple cut tubing and fit installation. Maintenance free. Easy to clean, body is designed for CIP cleaning.

Code	Description	Count	Case
4999-1180-119	AMBIC Milk Sampler, Complete	1	350
4999-1180-120	Bottle for Ambic Sampler 200mL	1	1

E

Mas-D-Tec™

Provides a simple, convenient and instantaneous means of detecting subclinical mastitis. MAS-D-TEC measures electrical conductivity in a small sample (2mL) of milk, detecting increases in conductivity long before other clinical symptoms are evident. The unit's electronic circuitry is completely enclosed in a strong, waterproof case for long, dependable service in the milking parlor environment. Designed for handheld operation, it is powered by a standard "9V" battery (included). 1,000's of cows can be tested on a single battery.
